

Public skin photoaging data nominate ECM-collagen remodeling for hydrogel design

A

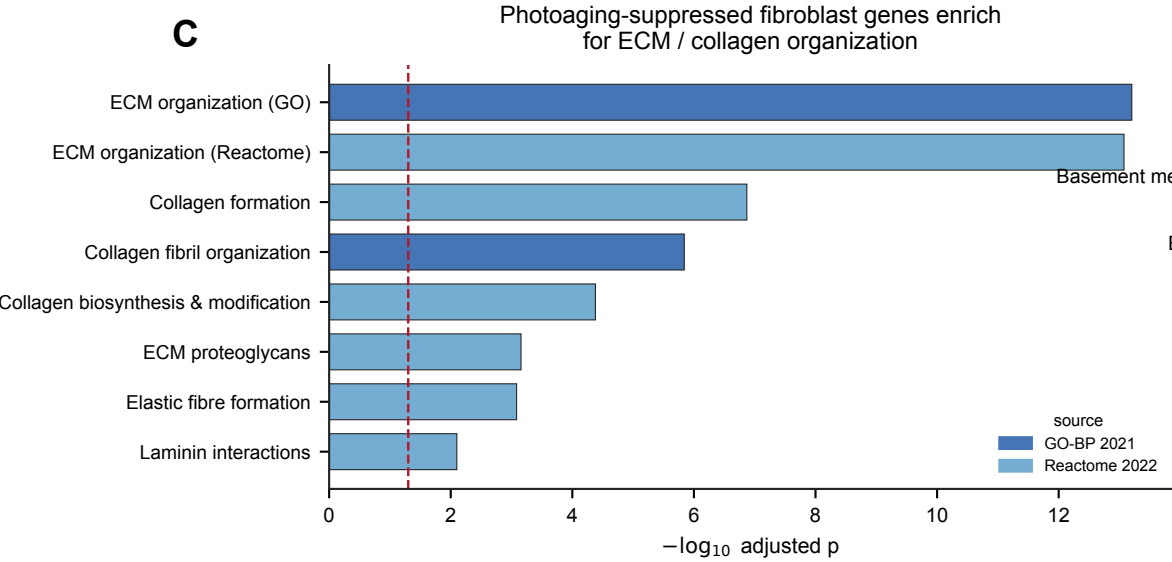

Public databases nominate the target (pre-experiment rationale)

B

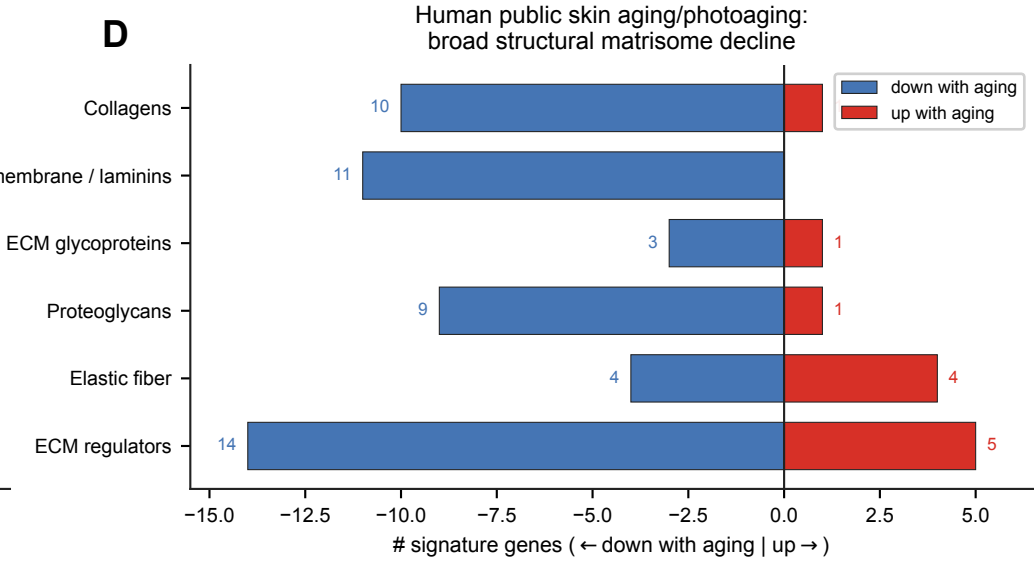

C

mouse genes via Enrichr; Reactome IDs are human reference R-HSA; red dashed = adj p 0.05

D

129-gene signature curated from published human skin aging / photoaging studies

E

Design rationale (how the public-nominated axis motivates the material -- not a Figure 1 result)
