

Supplementary public-data validation (Round 4): a replicate-aware, fibroblast-resolved ECM/collagen decline, honestly bounded

Independent public evidence converges on ECM/collagen decline in vivo;
GSE110978 adds the missing fibroblast-resolved, replicate-aware read-out

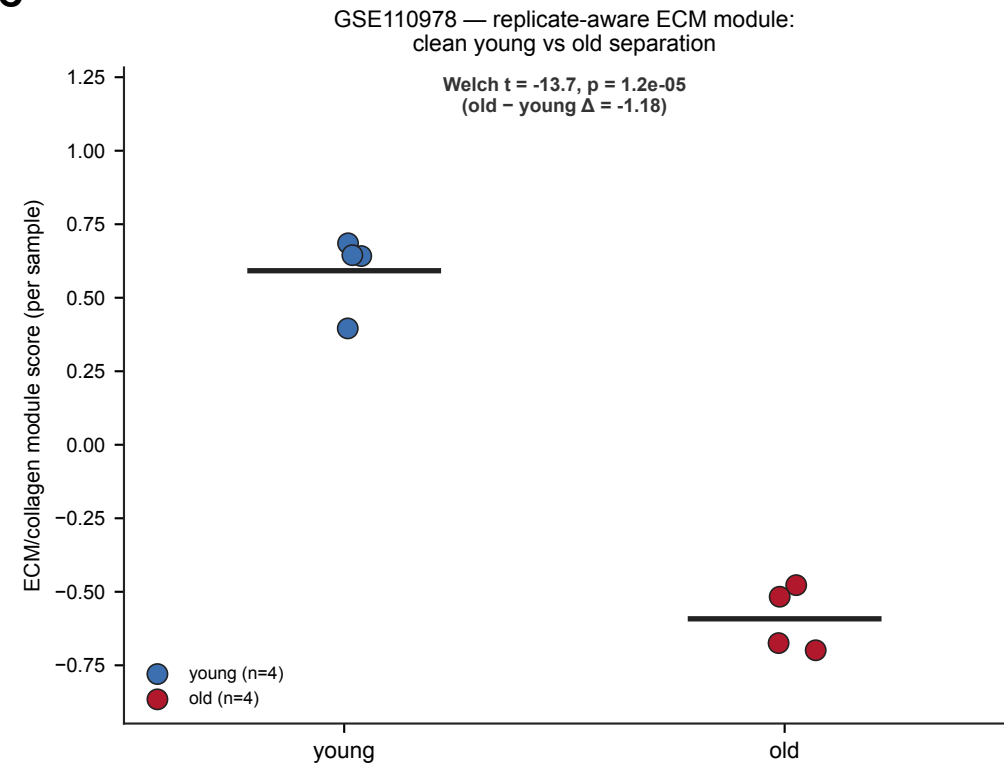

A

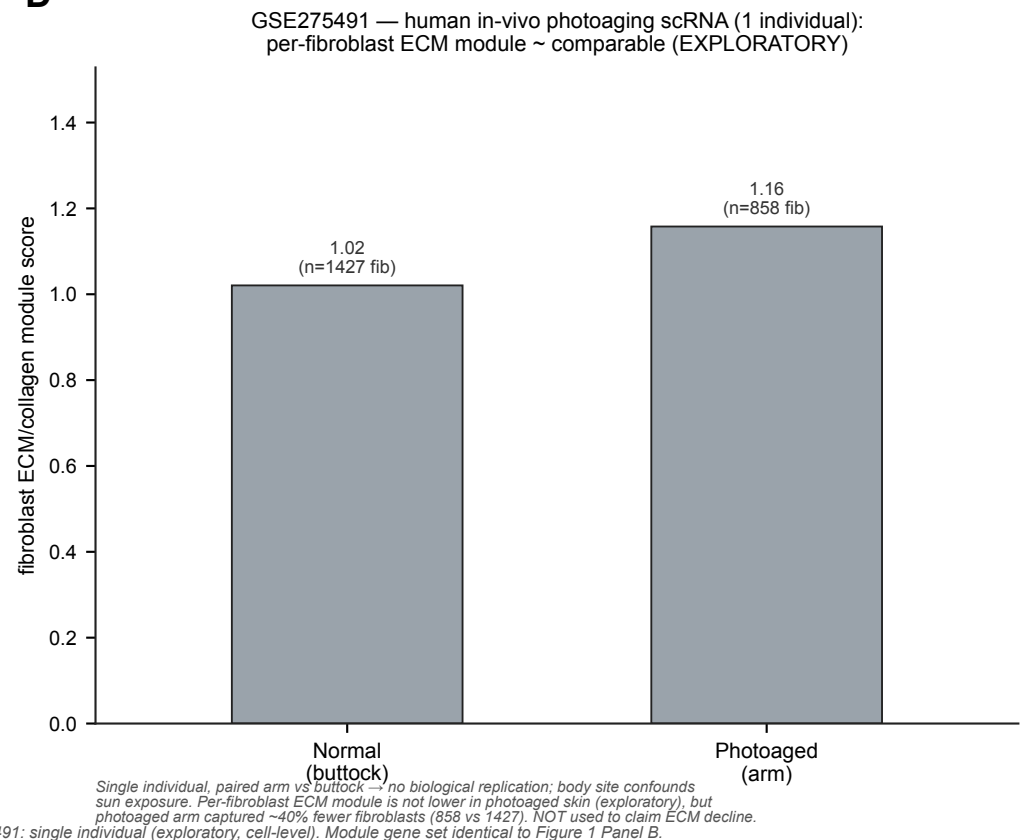

B

C

D

Public-data only (no experimental data from this study). GSE110978: replicate-aware in-vivo dermal-fibroblast aging (n=4 vs 4, Welch). GSE275491: single individual (exploratory, cell-level). Module gene set identical to Figure 1 Panel B.
